

## Instructions to add or remove individuals access to Member's Website Pages

Log onto [Cloudflare](#)

Go to [Policies - Cloudflare One](#). You can also find this in the **Zero Trust security** panel by clicking on **Access controls applications**.

The screenshot displays the Cloudflare dashboard for the account **Losgueroschapala@gmail.com**. The left sidebar contains navigation links for Account home, Recents, Domains, Observe, Investigate, Analytics, Build, Compute, AI, Storage & databases, Media, Protect & Connect, Application security, Zero Trust, Networking, Delivery & performance, and Manage account. The main content area features a maintenance notice, account information, and several analytics widgets. The Zero Trust security section is expanded, showing a list of security features. The 'Access controls applications' link is highlighted with a red circle.

**Scheduled maintenance:** June 22, 12:00-13:00 UTC  
Configuration writes for Workers, Pages, KV, Queues, Durable Objects, and Workflows may be unavailable for up to 3 minutes. Live traffic is unaffected. If a change does not succeed, retry after the maintenance window. [Dismiss](#) [Learn more →](#)

Then click on **Policies** in the left side menu.

There are two tabs at the top of the page, **Reusable policies**, and **Rule groups**.

Click on **Rule groups**.

The screenshot shows the Palo Alto Networks management console. On the left, the 'Policies' menu item is highlighted with a red box. In the main content area, the 'Rule groups' tab is selected and also highlighted with a red box. Below the tabs, the 'Your rule groups' section shows a table with one entry: 'Los Güeros Members'. The table has columns for 'Group name', 'Used by policies', 'Used by rule groups', and 'Group ID'. The 'Los Güeros Members' group is used by 1 policy and 0 rule groups. A red box highlights the 'Los Güeros Members' link in the table.

| Group name                         | Used by policies | Used by rule groups | Group ID                             |
|------------------------------------|------------------|---------------------|--------------------------------------|
| <a href="#">Los Güeros Members</a> | 1                | 0                   | ab6a6fb6-6419-4ed4-862e-693bf82a7d07 |

Once you are at the Policies → Rule groups tab:

Click on **Los Güeros Members**

Click on **Configure** button

The screenshot shows the configuration page for the 'Los Güeros Members' rule group. The 'Configure' button is highlighted with a red box. The page displays basic information about the group, including its ID, usage statistics, and creation/update dates. A table at the bottom shows the group details, including the selector and value for the 'Include' type.

| Type    | Selector | Value                           |
|---------|----------|---------------------------------|
| Include | Emails   | nancya@losgueros.com , dickb... |

To remove a person, click the **X** next to their email address.

To add a person, click at the bottom of the list of emails, where it says [email@example.com](#), type or paste in the new email, and hit **Enter** key.

When finished, click the **Save** button.

### Rules

Define rules with rule types, selectors, and selector values. Selectors represent the type of criteria you want users to meet. Configure additional selectors by adding lists, login methods, and device posture checks. [Selector documentation](#)

**Include** OR

If more than one Include rule is configured, users only need to meet one of the criteria.

| Selector                   | Value                        |
|----------------------------|------------------------------|
| Emails                     | nancya@losgueros.com         |
|                            | dickbaden@gmail.com          |
